

How do I add the Turning Technologies Registration Tool Link to My Home Page?

1. Go to your course in Blackboard and ensure that the **Edit Mode is On**:

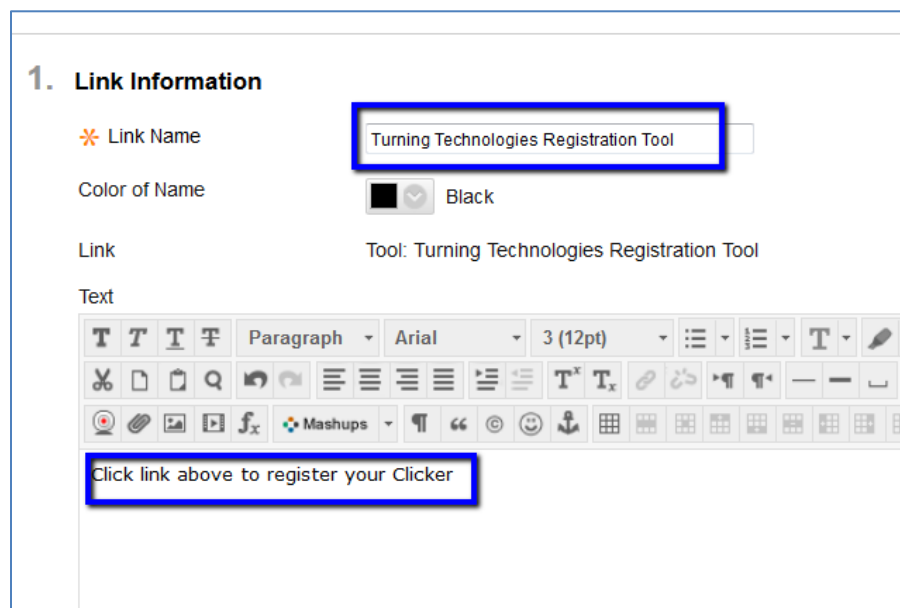

2. If you want the link added to your Home Page, make sure you are on the Home Page. If you want the link added to a folder, click on that folder.

3. Click **Tools > More Tools > Turning Technologies Registration Tool** as shown below:

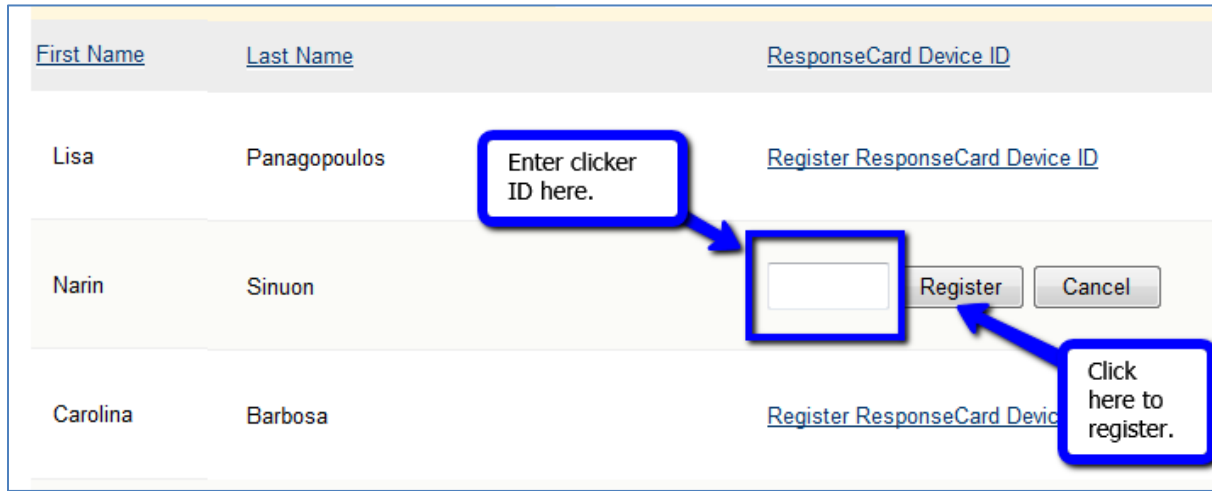

4. You can keep the Link Name as is, or change it if you prefer. Also, you can add a brief description in the Text box as shown below, if desired:

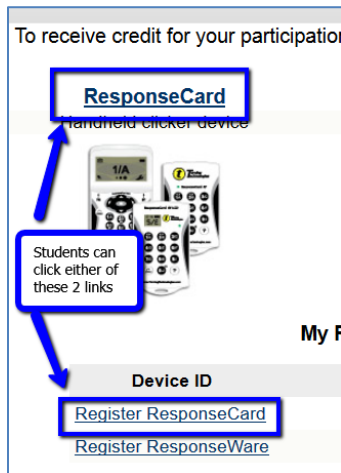

5. Click **Submit** to save your changes.

6. At this point, the instructor can register all clickers for the class by clicking on the “Turning Technologies Registration Tool” link and associating a Clicker ID with each student as shown here:

Another option is to have students register their own devices by clicking on the “Turning Technologies Registration Tool” link in their own class, and then entering their own Clicker ID. First, students click on “ResponseCard” or “Register Response Card” as shown here:

Next, students enter their Device ID then “Register” as shown here:
